3 Installation

Note:

- ① The controller can be connectd with any indoor unit for installation;
- ② Please install it in the indoor site with the strongest signal, closing to the router as much as possible.

Installation procedures:

1. Open the electric box of indoor unit;

2. Lead the communication port of G-Cloud from the wire outlet of electric box, and then connect the communication port of G-Cloud unit to the corresponding communication port on the main board of indoor unit;

3. Once connection is succeeded, close the electric box;

4. Adjust the G-Cloud to the proper position and then fix the main unit of G-Cloud to a certain position (user can select 3M tape or screws to fix it).

1) Notices for connecting wire

Please cut off the power of indoor unit before installation. No power supply during the while installation process;

2) Installation instruction

◆ As for assembly, please face the panel with reset button of G-Cloud to the operator. Then operator can operate it conveniently.

◆ Prohibit installing G-Cloud at damp place.

◆ The installation position of G-Cloud is different for different model. Please install it according to user' s requirement and the actual installation position of unit. (the installation position of G-Cloud in above figure is only for reference):

4 App Download

Scan the following QR code to download “EWPE” App

Note:

Supported system version: iOS7.0 system or higher version and Android 4.4 system or higher version.

Configuration Method:

- 1) For initial configuration, G-Cloud is under hotspot status after energization. Mobile phone can detect the hotspot of G-Cloud. Under this circumstances, configuration can be conducted manually. As for details, please operate it according to the instruction of manual configuration page of EWPE App.

- If the operator wants to conduct the configuration by one button, please reset the G-Cloud first. Two reset methods of G-Cloud: (1) Under on status, press “FUNCTION” button on display board to switch to WIFI function. Icon of WIFI flashes to enter into WIFI setting. The original temperature display place “888” displays current WIFI status. Press “UP” or “DOWN” button to select the setting content. Select “**RES**” and press “SWING/ENTER” button to save it, and then G-Cloud reset is finished.
- 2) Or hold G-Cloud button for 8s to reset it. Once reset is succeeded, conduct the configuration by one button. As for details, please operate it according to the instruction of one-button configuration page of EWPE App.

Note:

When changing router, name of route or password of router, it needs to conduct configuration again.

NOTE CONCERNING PROTECTION OF ENVIRONMENT

This product must not be disposed of via normal household waste after its service life, but must be taken to a collection station for the recycling of electrical and electronic devices. The symbol on the product, the operating instructions or the packaging indicate such disposal procedures. The materials are recyclable in accordance with their respective symbols. By means of re-use, material recycling or any other form of recycling old appliances you are making an important contribution to the protection of our environment. Please ask your local council where your nearest disposal station is located.

In case of quality problem or other please contact your local supplier or authorized service center.
